The screenshot shows the MySQL Workbench interface. The left sidebar displays a list of schemas, including 'ecom', 'ecommerce', 'ecommerce1', 'ecommerce2', 'employee', 'feedbackdb', and 'madan'. The 'madan' schema is selected, showing its tables and views. The main query editor displays the following SQL query:

```
1 • SELECT * FROM vaccination_center_app.admin_user;
```

The query results are shown in a table with the following data:

username	email	password
madan	madanreddy816@gmail.com	madan
MadanReddy	madanreddy223@gmail.com	madan

A message box on the right side of the interface states: "Automatic context help is disabled. Use the toolbar to manually get help for the current caret position or to toggle automatic help."
